

Simpleify your Network

## Network services & Monitoring in brief

Providing small to medium size businesses with total administration and support for their Local Area Networks (LAN's), in a cost-effective manner

Businesses have become increasingly dependent on computers and computer networks. Companies, employees, clients, and business partners are constantly inputting data into some network infrastructure.

NEI recognizes the urgency and the importance of that data flow, and its seamless continuation. The certified consultants at NEI have more than 20 years experience with building, administering, managing, and supporting LANs, as well as wide area networks (WANs) to a variety of clients in our city. NEI's Technical Consultants have worked with clients in a wide range of industries. We have assisted in the streamlining of their networks to ensure the continuous flow of data in and out of their network infrastructure. These exceptional services are now available to small and medium-sized businesses at an incomparable price.

Network Solutions Inc.

### SERVICES:

- Network Administration
- Network support
- Off-site network monitoring
- On-site service
- Network evaluation
- **Total Administration**
- **Internet zone (new)**

### TOTAL ADMINISTRATOR

**Total Administration** is a new way of providing for your network support needs. This service includes **all** the above-mentioned services for one network server. For offices with more than one server an additional fee will be charged. The client will pay for all software purchases, and for a device hardware failure. A one-time fee will be charged for server hardware Y2K compliance and system evaluation. For cost details of the above services, please contact our office.

### SECURITY

Network and data security is foremost on our clients' mind. Our team has worked on communication projects ranging from government to military. This is the experience we bring to you.

### SUPPORT:

Maintenance of your existing servers and server peripherals, as well as your office network infrastructure, is our primary goal. Maintenance of the network operating system (NOS), network applications and the backup/restoration of your servers would be a responsibility of the support staff at NEI. Maintenance would not be complete without the efficient and prompt response to your network server emergencies.

Internet Zone

### OFF-SITE MONITORING:

As a contract client you will be provided with this unique service, during the most crucial times of your workweek. Using the latest technology, your network servers will be under constant monitoring during business hours. Off-site monitoring will include data traffic, server performance and error logs. System, application, security and error logs will be analyzed and any issues will be resolved. Weekend monitoring will also be made available.

### ON-SITE SERVICE:

Up to four hours per week will be allocated for each network server. One or more of our network technical consultants will be at your offices during this time to perform troubleshooting, upgrades and other network related duties. Client issues will also be addressed during this time.

### EVALUATION:

Network evaluation and problem resolutions for network issues, including network operating systems (NOS), network applications, network printing, e-mail and connectivity will be addressed. Evaluations of network **SECURITY** to servers and data. If existing security is not adequate other services will be proposed. **Disaster** prevention strategy will be developed and implemented if none exist in place.
